# ABOUT US

## PRODUCT INTRODUCTION

The PapaPaw DietMatch is an intelligent cat feeder featuring cat face recognition for food access. Upon successful cat face recognition, one of the 6 grids will be precisely moved to the cat. Equipped with independent baffles, each grid is designated for one cat, putting an end to food snatching among cats.

The 6-grid design also offers flexible compatibility with various food types. Whether it's dry food, wet food, freeze-dried treats, sheep's milk, or other ingredients, this feeder makes it easy to provide diversified nutrition—ensuring your pet enjoys exclusive and balanced meals even when dining alone.

1 feeder, 6 grids  
Cat face scan access to food  
Intelligent automatic feeder

## ● Packing List

| Item                         | Quantity | Item                   | Quantity |
|------------------------------|----------|------------------------|----------|
| Top Cover                    | 1        | Bottom Shell           | 1        |
| Food Container               | 1        | 5V/2A Power Adapter    | 1        |
| Camera & Rotating Controller | 1        | Anti-Snatching Baffles | 2        |
| Standing Brackets            | 4        | Instruction Manual     | 1        |
| Ice Box                      | 1        |                        |          |

## ● Product Structure

① Top Cover (1 piece)

② Anti-snatching Baffle (2 pieces)

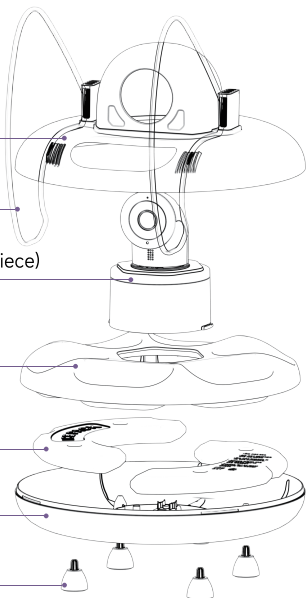

③ Camera & Rotating Controller (1 piece)

④ Food Container (1 piece)

⑤ Ice Box (2 piece)

⑥ Bottom Shell (1 piece)

⑦ Standing Bracket (4 pieces)

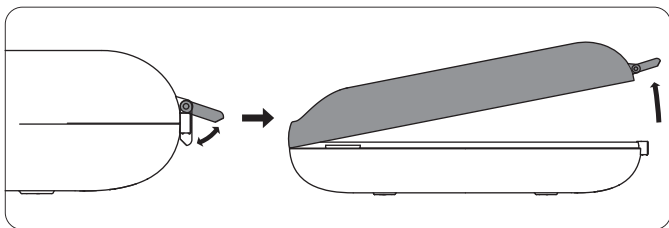

# ● Installation And Connection

## How to Open the Lid

STEP 1

Put the feeder flat, Unlock the ring fastener at the back of the top cover with one hand, then lift the entire lid.

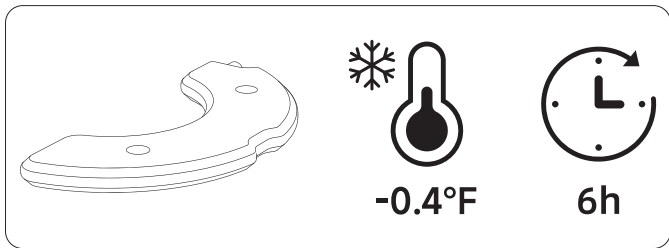

## How to Use the Ice Box

STEP 2

Take out the ice box and place it horizontally in the freezer compartment of a refrigerator.

Freeze it at  $-0.4^{\circ}\text{F}$  for at least 6 hours before use.

**Warning:** Do not freeze the ice box in an upright position. Freezing it upright may cause the box to bulge, which affects the feeder's normal performance. Use the ice box properly to keep perishable foods (such as canned food and fresh meals) fresh at low temperatures. Dry foods (e.g., dry kibble, freeze-dried treats) do not require low-temperature storage. The freshness retention effect is affected by environmental factors; actual freshness duration may vary based on usage conditions.

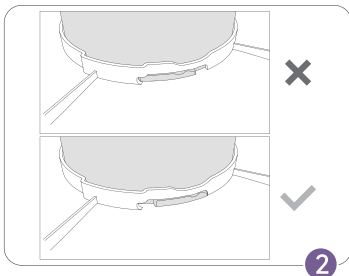

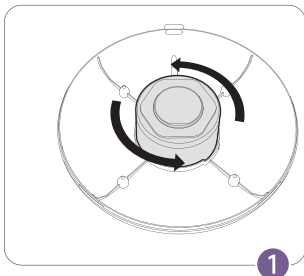

# ● Installation And Connection

## Movement Installation

STEP 3

Align the movement's buckles with the mounting slots on the bottom shell. Hold the movement and rotate it counterclockwise until you hear a "click" sound. Check to ensure the movement is installed securely in place.

**Warning:** If the movement is not installed properly, the food grids will be misaligned and affect normal operation of the product.

## Download APP

STEP 4

Download PapaPaw App (you can also search for "PapaPaw" directly in the App Store to download it).

## Connect The Device

STEP 5

Use PapaPaw App to scan the QR code located at the bottom of the product.

(For more detailed pairing instructions, refer to the "UserGuide" in the App's "Personal Center".)

# ● Feeding Modes

## ① Scheduled Feeding

Set the feeding time in advance. The feeder will accurately rotate to the designated grid and automatically dispense food for your cat at the preset time.

## ② Self-service Feeding

When your pet approaches, the feeder will automatically switch to a grid filled with food, allowing your cat to eat anytime without waiting for you.

## ③ Cat Face Recognition Feeding

Register your cat by uploading a front-face photo of it. Bind an exclusive grid and feeding schedule to your cat. During the scheduled feeding time, once the cat face is scanned and recognized, the feeder will rotate to the cat's exclusive grid, ensuring it gets exclusive meal on time.

## ④ Manual Feeding

You can remotely control the feeder's food box with one click to dispense food. This flexible feature lets you feed your pet anytime, no matter where you are.

## Real-time Monitoring

01

After successfully adding the device to the APP:

- Enter the "Real-Time View" section to manually control the rotation of the food box.
- Check your pet's real-time activities at any time.
- The feeder also supports two-way voice calls, one-click photo capture, remote interaction, and precise feeding—all in one step.

## Privacy Protection

02

You can easily set a "sleep time" for the device in the App's settings. During the sleep period, the camera will automatically turn off to protect your privacy.

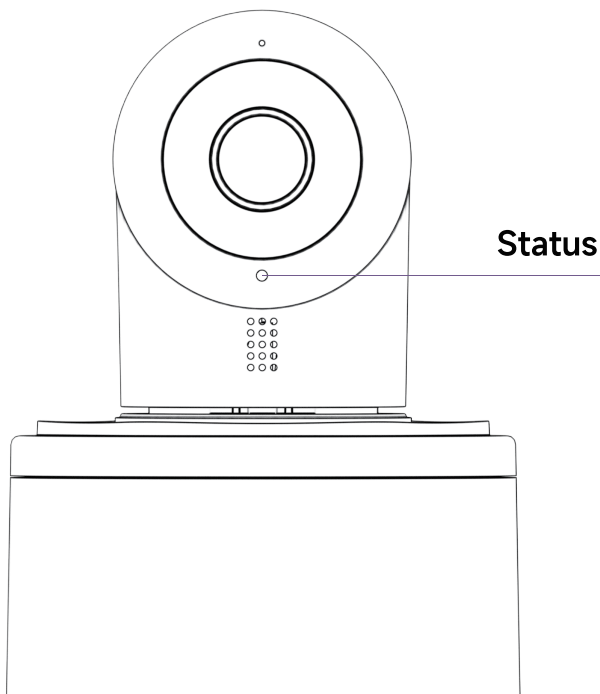

## Video Recording

03

The feeder has built-in storage that only automatically records and saves videos when there are changes in your pet's movement (it does not continuously record throughout the day). This saves storage space while accurately capturing your pet's activities. When the storage is full, older videos will be automatically overwritten in a loop—no manual deletion is required, and key moments are easily preserved.

# ● Status Indicator

Status

| Light Color | Status                | Description                       |
|-------------|-----------------------|-----------------------------------|
| ● Red       | Offline               | Device is offline                 |
| ● Yellow    | Self-Inspection       | Device is performing a self-check |
| ● Green     | Normal Operation      | Device is working properly        |
| ●● Flashing | Network configuration | Network configuration             |

## ● Specification Parameters

|                                                                                           |                                                                                   |
|-------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------|
| Brand name: Papapaw                                                                       |  |
| Product Name: PapaPaw DietMatch                                                           |                                                                                   |
| Product Model: Paw06                                                                      |                                                                                   |
| Product size: 12.6 x 10.5 x 8.3 in                                                        |                                                                                   |
| Material: food grade ABS, HDPE (Ice box)                                                  |                                                                                   |
| Applicable Pet Food: all kinds of pet food                                                |                                                                                   |
| Applicable Pet: cat (over 2 months old)                                                   |                                                                                   |
| Capacity: 200ml per grid (6 grids total); Each grid holds approximately 85g of dry kibble |                                                                                   |

## ● Device Placement

- Place the device on a stable, flat surface. Do not tilt, shake, or invert it.
- Store the device indoors in a dry area, away from direct sunlight and damp environments. Do not place the device at height to prevent damage from falling.
- Do not install or store the device in areas where the temperature is below 0°C.
- Do not place heavy objects on the feeder or use it to support other items.
- Ensure there are no obstructions on or around the food tray—this prevents interference with your pet's eating and avoids damage to the device.

## ● Cautions

1. The facial recognition function is only applicable to cats.
2. This product is intended for use by individuals aged 12 and above. Children under 12 must use it under adult supervision.
3. The filling inside the ice crystal box is not edible. Do not use the device if it is damaged.
4. Never immerse the device in water—this may damage internal electronic components.
5. Do not disassemble, repair, or modify the device's controller. Doing so will void the warranty.
6. To prevent electric shock, never immerse the power cord or plug in water or other liquids.
7. If the power cord connector gets wet or comes into contact with water accidentally, disconnect the power immediately. Ensure the power cord is completely dry before using the device again.
8. The device only supports a 5V/2A power adapter. Do not use an adapter with voltage/current exceeding this range.
9. When not in use, turn off the device and store it properly.
10. Dispose of all packaging materials correctly. Some parts may be packed in plastic bags, which pose a suffocation risk. Keep these bags away from children and pets.
11. The feeder is intended only for feeding cats—do not use it for any other purpose.

# ● Cleaning & Maintenance

## ● Clean the interior and food tray

- ① Rotate the controller clockwise and lift it out.
- ② Rinse all the parts except the controller with water. Do not use metal kitchen tools (e.g., steel wool) or abrasive cleaning materials, as these may scratch the product surface. If available, you can also clean these parts in a dishwasher.

### WARNING

For perishable foods (such as fresh meals or canned food), clean the feeder immediately after use or no later than the next day to prevent food spoilage.

## ● Clean the controller

- ① Remove the controller from the feeder.
- ② Wipe the controller with a soft, damp cloth. Do not wash the controller with water.

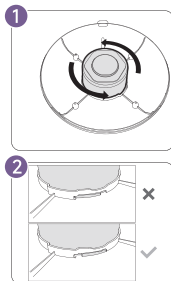

### WARNING

The controller is not fully waterproof. Damage caused by immersing the controller in water is not covered under warranty.

## ● Reinstall the Controller

- ① After cleaning, align the controller's buckles with the mounting slots on the bottom shell.
- ② Rotate the controller clockwise until it is securely in place (you may hear a "click" sound).
